### GENERAL

- TS-4000 series have flame proof structure and can be installed in hazardous area, gas might be present in, and continuously detects combustible, oxygen & toxic gas
- It has high efficient diaphragm pump having long service life
- It has excellent selectivity to react only with corresponding gas. Therefore, it minimizes malfunctioning due to interfering gas
- Also it shows excellent performance for detecting very low gas concentration (below TLV)
- Calibration port is located in front of gas detector to make calibration easier
- It has guaranteed reliability and minimized influences of temperature, pressure, humidity and electrical noise.
- Analog output (4-20mA DC) is delivered to controller, DCS & PLC and gas monitoring system
- It is 3 wire type and installation is easier than existing products (5-6 wire type) with low cost
- There are various accessories for each onsite condition (Optional item)
